Sir:

Prior to calculating the filing fee and prior to the examination of the above-identified patent application, the Examiner is respectfully requested to enter the following amendments which incorporate amendments made in the parent application:

IN THE SPECIFICATION

Please replace the paragraph between lines 4-8 on page 7 of the specification with the following (see Appendix 1 for changes):

This valve can initially be closed during the formation of the callus. Thus the implant is perfectly rigid and behaves like a classic screw. The valve is then opened so that the implant functions according to the invention, with its shock-absorbing function. A valve
